

NEW!

Making your crops fitter!

GO-Pro 50SL

Contains: 5% specially selected essential L-amino acids.

Healthier plants

***Highly increased
stress resistance***

Better quality

***Improved fertilizer
efficacy***

Higher yields

EFFECTIVE IN ALL TYPES OF CROPS

Agricultural

Vegetable

Orchard

G C i C

Global Crop Improvement Company

The product is designed to reduce the abiotic stress in plants caused by negative environmental factors: cold, frost, drought, and waterlogged soil effects.

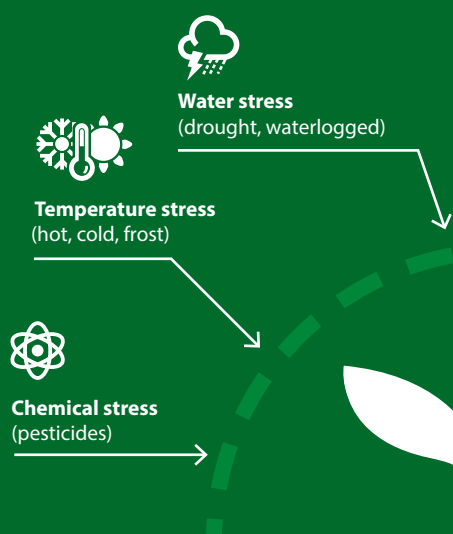

It adjusts the speed of assimilation of macro and trace nutrients and stimulates the immune system of plants.

It substantially improves plant productivity and crop quality.

Stable and active formulation

Content	(w/v)
Free L-amino acids (vegetable origin)	5 %
Ureic N	4.0 %
Organic N	0.6 %
Total N content	4.6 %

A plant during its growth may face many different stresses:

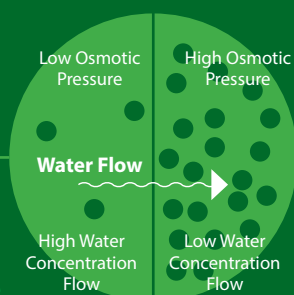

GO-Pro mechanism of action:

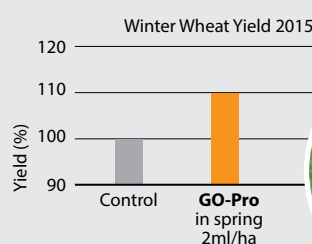

Improved stress tolerance is achieved by artificially increasing osmolytes in the cells of plants using GO-Pro.

GO-Pro interacts with enzymes to preserve protein structure and activities, which in turn helps the cell to maintain membrane strength.

GO-Pro accumulates in the cells and helps balance osmotic pressure in the cell, therefore helping to reduce dehydration of the cell under drought conditions.

A plant during its growth may face many different stresses:

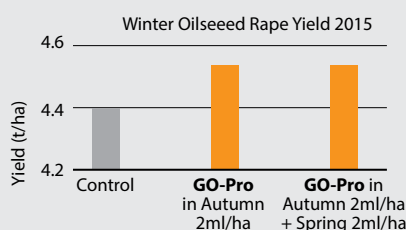

The official trials have shown significant increases on yield of tested crops. Application of GO-Pro increased the yield of wheat by 400 kg/ha on average.

Source: Miranovo Wheat Research Institute, Ukraine.

GO-Pro trials Autumn + Spring:

The official trials have shown significant increases on yield of tested crops. Application of GO-Pro increased the yield of oilseed rape by 200 kg/ha on average.

Source: Lithuanian Agricultural University, ASU

Early prevention of stress leads to better yields

(do it before damage/suffering of the crop is evident)

Crop	Application rate [ml/ha]	Water volume [l/ha]
Field crops	40	200
Vegetables	80-160	200
Ornamentals	80-160	200
Orchards	80-160	400-1000

Quick guide:
1 litre treats 25Ha at the low rate

Package: **5 L**
