

# GO-Premium

Organic Matter with Amino acids and seaweed extract

## Characteristics

- *Ascophyllum nodosum* based with a high content in natural biostimulants (cytokinin and auxin), amino acids, NK and organic matter.
- It is conceived for stimulating the roots absorbing fuzz, the growth of the root and the plant adaptation to a new soil after the transplant.

| Declared Content                                 | % w/w |
|--------------------------------------------------|-------|
| Total Nitrogen                                   | 7     |
| Potassium oxide (K <sub>2</sub> O) water soluble | 3     |
| Organic matter                                   | 18    |
| Total amino acids                                | 17    |
| Free L amino acids                               | 9.5   |
| Dry seaweed extracts                             | 6     |

## Dosage & Application

### Fertigation:

- **Horticultural crops:** 2-3 L/ha.
- **Fruit trees:** 3-4 L/ha.
- **Vineyard:** 2-3 L/ha.

### Foliar application:

- **Horticultural crops:** 100-150 cc/100 L.
- **Fruit trees:** 200 cc/100 L.
- **Vineyard:** 100-150 cc/100 L.

## Advantages

- Seaweed biostimulants, amino acids, NK and organic matter enriched high input.
- High technology manufacturing from selected raw materials.
- Root system and rooting enhancement.
- Plant adaptation to new soil after the transplanting.
- It assures very crop establishment.
- It enhances the growth during the season.

pH =  
8.1

Density  
= 1.2

## Compatibility

GO-Premium can be mixed with the phytosanitary products and fertilizers commonly used in agriculture, except products based in mineral oils, sulfur, copper or any other product of alkaline nature (pH>8).
