

Amino acids for foliar application.

GO-AMINO

AMINO ACIDS
COMPLEX

GOLD

G C i C

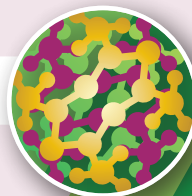

DESCRIPTION

GO-Amino Gold is a biostimulant rich in organic matter with concentrated free amino acids designed for quick assimilation by foliar application. It has important effects on crop development, flowering and fruit setting and helps recovery from stress. It enhances crop growth and contributes to the final yield. The presence of free amino acids increases the foliar absorption of nutrients and aids their translocation in the plant.

DECLARED CONTENT

	w/w
Total Nitrogen (N)	6.5%

DOSAGE AND INSTRUCTIONS FOR USE

GO-Amino Gold is recommended for foliar application. It is recommended during periods of high requirement of the crop like pre-blooming, petal fall, fruit development and during all kind of stress, according to the following dosages: Citrus, fruit trees (except plum trees): 200-300 ml/100 L water (2-3 during the whole cycle of the crop), Horticultur-

al crops: 100-200 ml/100 L water (3-5 applications during the whole cycle of the crop repeating at 2 week intervals between each treatment), industrial crops (cereals, maize, legumes): 200-300 ml/100 L water (1-2 during early stages of growth and abiotic stress conditions), industrial root crops (potato, sugar beet): 200-300 ml/100 L water (2-3 during the whole cycle of the crop and abiotic stress conditions).

Crops	Dose (L/Ha)	Application time
Industrial crops (cereals, oilseed, maize, legumes, grass and etc.)	0.5-1.5	1-2 times during vegetation and abiotic stress conditions
Root crops (potato, sugar beet, root and bulb vegetables, etc.)	1.0-2.0	2-3 times during vegetation and abiotic stress conditions
Horticultural crops (tomato, leaf vegetables etc.)	1.0-2.0	3-4 times during vegetation and abiotic stress conditions
Fruit trees and berries (except plum trees)	1.0-2.0	2 times during vegetation (before and after flowering) and abiotic stress conditions

COMPATIBILITIES

GO-Amino Gold can be mixed with the phytosanitary products and fertilizers commonly used in agriculture, except products based in mineral oils, sulphur, copper or any other product of alkaline nature (pH>8). Do not apply to plum trees.

STORAGE CONDITIONS

Keep between 5°C and 35°C in a dry and ventilated place.

NOTE: *The recommended dosages, here detailed, are indicative, only the user can increase them or reduce them according to the plant vegetative stage and the soil.*

Conditions of Supply

Our products are high grade and we believe them suitable for use as directed, but as we cannot control their mixing, use or weather conditions during and after application, no condition or warranty is made as to their quality or fitness and no responsibility will be accepted for damage or injury arising either directly from their storage, handling or use. No liability shall be accepted for any loss or damage caused due to any person failing to use the product in accordance with the instructions for use. SAFETY DATA SHEET: A safety data sheet is available on request.
